

Customade REAL Aluminium

WARNINGS

If you get any warnings similar to the one shown below when designing your frames, then please read them. It's usually advising you that the item cannot be priced. These warning will remain on screen until you click on it.

DO NOT IGNORE THESE WARNINGS

DUMMY MULLIONS & TRANSOMS

Dummy mullions & transoms are not available on TT for aluminium casements so cannot be included on a window. (Dummy mullions and transoms are only available from Customade on the 400i internally beaded system)

EGRESS STAYS

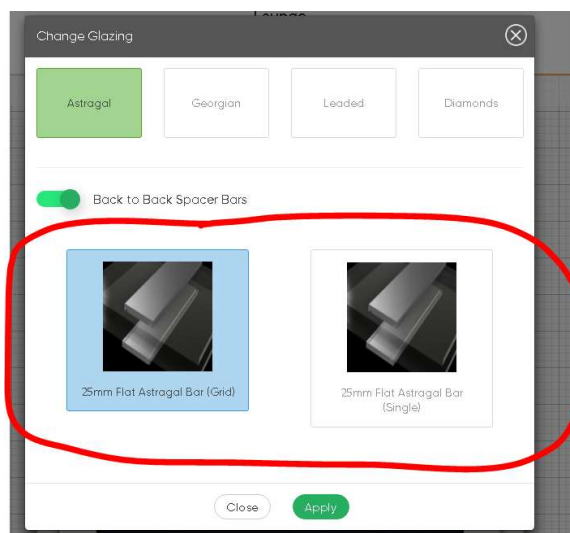

Egress stays are included as standard

TRICKLEVENTS

You will need to add tricklevents to comply with the regulations. Tricklevents can ONLY be fitted into a 42mm or 30mm add-ons. They cannot be fitted into the head bar, sash or a 20mm add-on, even though TT will allow you to do so.

ASTRAGAL BARS

Astragal bars can be added in the 'GLAZING' section. Please select either 'GRID' or 'SINGLE BAR' from the menu (see screenshot below). Note: These options only affect the price, they will not change the astragal bar layout. You must select the correct option then draw the correct astragal bar layout on the window/door.

SPECIAL COLOURS

White/White, Black/Black, Grey/Grey and Grey/White are the standard colours and can be priced on TT. Any other colour option will need a manual price. TT will allow you to select special colours inside and outside to allow you to show the correct colour on the quote, but it will hugely inflate the price to flag to you that a manual price is required. Please use the **Pricing Request** facility to obtain a manual price.

IMPORTANT NOTE:- **Black/White is a special colour**. TT will not inflate this price but it will still need a manual price.

TRIPLE GLAZING

400i and 400 Flush can be triple glazing but 400x can't. TT can't set glass to be allowed on one product and not another.

Therefore, triple glazing has not been allowed on TT and will need a manual price.

FLYING MULLION

To price a flying mullion window, design the style as a standard double side hung opener. You then need to add the Extra for Flying Mullion from the Parts Shop. This adds the extra cost.

PATIO DOOR - INTERNAL UPSTAND

This cannot be priced on TT and needs a manual price.

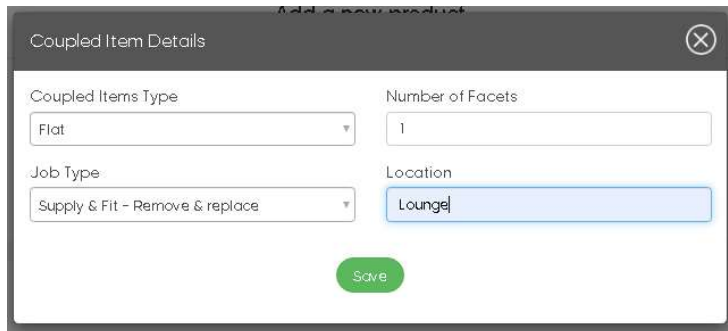

PATIO DOOR – LOW ALUMINIUM THRESHOLD

This cannot be priced on TT and needs a manual price.

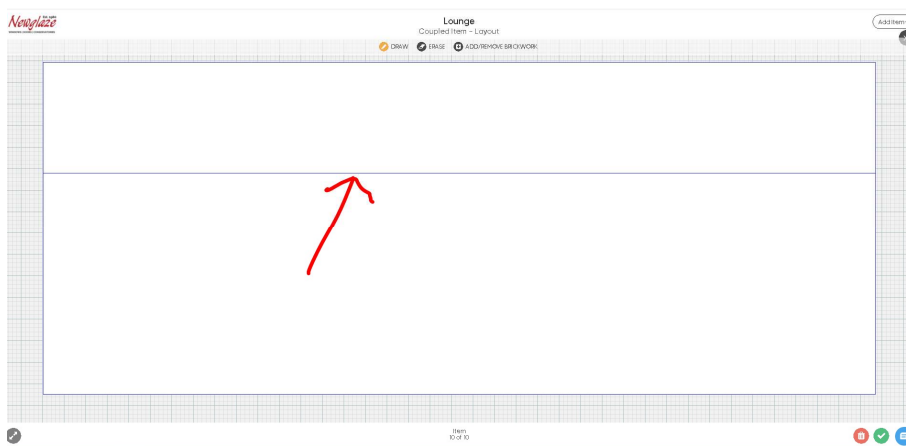

SINGLE DOOR WITH TOPLIGHT

All toplights and sidelights must be coupled to the doors (REAL do not make combination door frames). To process doors with sidelights use the 'Aluminium Coupled Items' option (ie a Bay).

To process doors with toplights, create a bay with a single facet, then draw a horizontal line across the facet to create 2 frames separated by a coupler (see screenshots below).

The 'Coupled Item Details' dialog box is shown. It has a title bar with a close button. Inside, there are four input fields: 'Coupled Items Type' with a dropdown menu showing 'Flat', 'Number of Facets' with a text input showing '1', 'Job Type' with a dropdown menu showing 'Supply & Fit - Remove & replace', and 'Location' with a text input showing 'Lounge'. A green 'Save' button is at the bottom center.

When you OK this design, you can then add the 2 separate frames.

BIFOLD DOOR HARDWARE

It is not possible to set the colours of the Hinges and Magnetic Catches. Tommy Trinder will allow you to select several options that are not available, such as Stainless Steel hinges or Painted D Handles. Be sure to only select an available option.
