WARNINGS

If you get any warnings similar to the one shown below when designing your frames, then please read them. It's usually advising you that the item cannot be priced. These warning will remain on screen until you click on it.

DO NOT IGNORE THESE WARNINGS

DOOR STYLES

Evolution cannot manufacture doors and sidelights in one frame, they must be coupled. Doors with top lights are ok. However, Tommy Trinder will allow you to select door/sidelights made as one frame, but it will not price them. **Do not select these styles!** You need to create them as a coupled product ie Process them as a bay with an Evo door and Evo window as a sidelight.

EGRESS STAYS

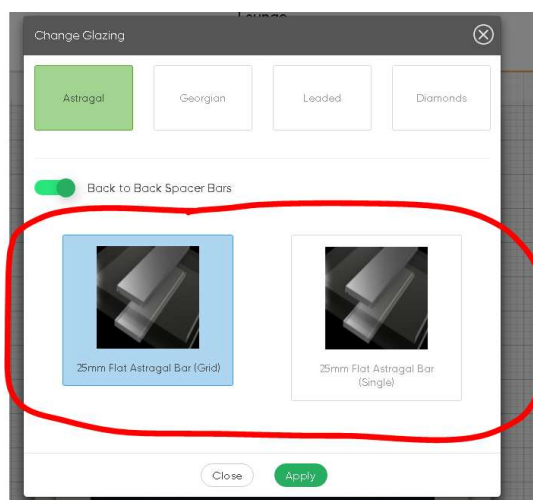

Egress stays are included as standard, you do not need to select them.

TRICKLEVENTS

You will need to add tricklevents to comply with the regulations. Tricklevents can ONLY be fitted into a 72mm wide head bar. They cannot be fitted into a sash or add-on even though TT will allow you to do so.

ASTRAGAL BARS

Astragal bars can be added in the 'GLAZING' section. Please select either 'GRID' or 'SINGLE BAR' from the menu (see screenshot below). Note: These options only affect the price, they will not change the astragal bar layout. You must select the correct option then draw the correct astragal bar layout on the window/door.

GEORGIAN BARS

Georgian bars are not available on Evolution products, even though Tommy Trinder will allow you to add them. Do not select them.

FOIL COLOURS - IMPORTANT

TT always defaults to smooth white PVC. You will need to change the colour.

TT will only price the standard Evolution colours. Listed below:-

- White Wood / White Wood
- Cream / White Wood
- Cream / Cream
- Black / White Wood
- Natural Wood / White Wood
- Evo Oak / White Wood
- Agate Grey / White Wood
- Anthracite Grey / White Wood
- Rosewood / White Wood
- Olive Grey / White Wood

Any other colour will need a manual price.

TT will allow you to select special colours but it will hugely inflate the price to highlight to you that a manual price is required.

Underlined colours in the list will be slightly more expensive because these colours require the frame to be fully reinforced. This applies to windows only.

FLYING MULLION

To price a flying mullion window, design the style as a standard double side hung opener. You then need to add the Extra for Flying Mullion from the Parts Shop. This adds the extra cost.

PARTS SHOP

The following items need to be selected from the Parts Shop:-

- Thumbturn Cylinders
- Keyed Alike Cylinders
- Extra for Load Bearing Baypole
- Cat flaps

PEGSTAYS

TT will not show the correct colour when you select pegstays. It will always show them chrome. It will just display an image of the pegstay to indicate that one has been included. When the product gets ordered, the pegstay colour will be matched to the handle colour.

190mm DOOR MIDRAIL

The price for the deep 190mm midrail is included as standard on single doors. Double doors generally do not use the 190mm midrail so the standard 116mm midrail is included.

DOOR STYLES

TT has a limited range of available door styles, most of which are for conventional PVC doors. Evolution has an unusual range of door styles, many of which are not available on TT. Below are the most common Evo door styles that are not available on TT. However, you will be able to create these styles and add them to a quote, but it will not price them so a manual price request will be required. I have asked TT if the below styles could be added so they may be available in the future.
