## Charisma cill options

RPB24-01 | January 2024

### Summary

Effective immediately, Charisma Rose protruding cill options are changing.

### Details

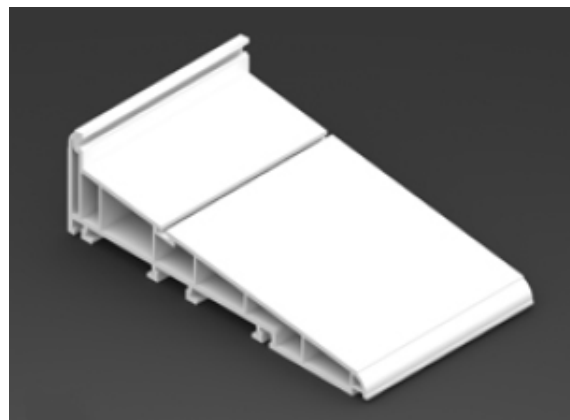

At the end of 2023, Eurocell discontinued their range of 180mm & 210mm sub-cills that are used in our Charisma Rose model.

To replace the discontinued range, Eurocell are now offering a 180mm integrated cill, with a 210mm cill extender option. Please note that the 210mm extender cannot be retro-fitted to the new 180mm cill – it has to be included when the window is manufactured.

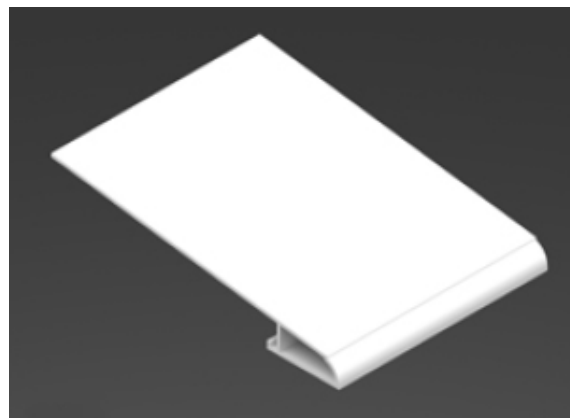

The new integrated cill options will be available in the same range of foiled and sprayed finishes as the rest of the Charisma Rose range

Effective immediately (January 2024) all new and existing Charisma Rose orders will be processed with the new integrated cills.

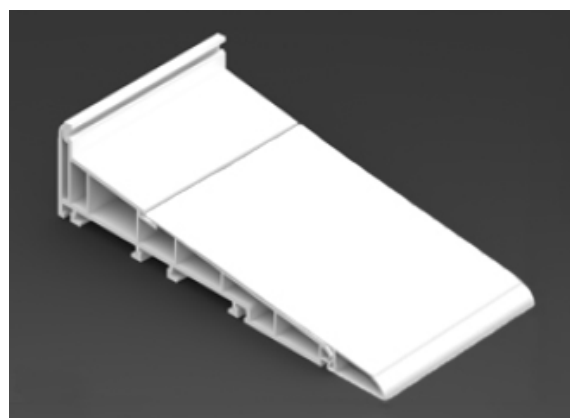

For more information please contact our estimating & order processing team - [trade@roseview.co.uk](mailto:trade@roseview.co.uk)
